

## Mounting instruction

### Locking ring for Trimilin models with screwed on legs

1.

Place the locking ring on the leg stud and screw it on for about 2 turns.

2.

Place one of the legs onto the leg stud and

3.

screw on the leg fully up to the end of the leg stud.

Should you encounter a problem in step 1 with positioning the locking ring, take the leg first and screw it on to the end of the winding. Then twist it off again and repeat step 1, screwing on the locking ring for just about two turns.
